

# What is **ALPE**?

**ALPE** (Accessible eLearning Platform for Europe) provides services to create, develop and enhance accessible educational resources. Our international network of expert partners help you deliver educational materials that are accessible to all groups of learners.

## 8 Reasons to Choose **ALPE**

- We support your accessibility initiatives through a network of international experts that will enable you to develop the accessibility best practices that suit the needs of your organisation.
- We provide a fully accessible and standards based eLearning platform built in the dotLRN virtual learning environment (VLE).
- We have the ability to guide accessibility and usability evaluations of your eLearning products to ensure they are available to all groups of learners.
- We have experience: our eLearning platform and portfolio of basic skill courses have been tested for accessibility with people with disabilities and adult learners.
- We provide provide a Basic Skills Course Portfolio with more than 20 courses on literacy, numeracy and Information & Communications Technology (ICT) skills.
- We are experts. The ALPE Consortium is leaded by Soluziona (Indra Group), with the participation of UNED, the Open University UK and the Pan-Hellenic Association of the Blind.
- We know technology and R&D. We are committed to research and innovation in the area of accessible systems. Consortium members are actively involved in national and international accessibility research projects. ALPE members guide the development of accessibility standards.
- We believe in what we do. ALPE is fully committed to the principle of providing people with disabilities equal opportunities to access education, educational materials and information technology products and systems.

**ALPE : Committed to accesible eLearning**•••
